Summary

As a frontend developer, my core competencies lie in creating visually appealing and user-friendly web interfaces. I excel in HTML, CSS and JavaScript, with a strong understanding of responsive design and cross-browser compatibility. I am proficient in frameworks such as React, Bootstrap and Tailwind CSS, and have experience with version control systems like Git. Additionally, I have a keen eye for detail and a passion for optimizing websites for speed and performance. My problem-solving skills, ability to collaborate with cross-functional teams, and dedication to staying updated with the latest industry trends make me a suitable candidate for this job.

Experience

Frontend Developer

Personal Projects

Sep 2022 - Present (11 months)

I regularly participate in personal initiatives to further my professional goals and passions since I am a driven and passionate person. These projects demonstrate my inventiveness, problem-solving talents, and dedication to lifelong learning. My own projects demonstrate my ability to take initiative, manage deadlines, and provide high-quality outcomes, whether they be building websites, programming mobile applications, or producing digital artwork. Through these activities, I have improved my technical skills, broadened my knowledge, and showed my commitment to personal and professional development
